Cream 90cm Wall Cooker Hood

LED Lights:

The LED Lamps provide efficient, sustainable lighting with a soft glow, high performance, and a long lifespan.

Price:
RRP. R9850,00

Conscious Choice:

The size and capacity of the extraction should match the specific requirements of your kitchen. The hood's extraction is measured in cubic meters for the air renovation. The optimal recommendation is to achieve 12 renewals per hour, aligned with your kitchen's volume:

Kitchen volume = width x depth x height
Example: 3 m x 3 m x 2,5 m = 22,5 m³

12 Renovations per hour
Example: 12 x 22,5 m³ = 270 m³

Aluminium Filters:

The aluminium filters excel in capacity, are easily removable, and can be cleaned by hand or in a dishwasher.
