

ID-01 | 60cm Slimline Cooker Hood Black

Features:

- 400m³/h extraction rate
- Noise level: 55dBa
- Front push button controls
- 4 Layer aluminium grease filters
- Grease filters are dishwasher safe
- Voltage & Frequency: 220-240/50
- Lighting: 1 x 3 watt LED Strip
- Satin black

Included:

- Charcoal Filters for recirculation
- Butterfly

Extraction Rate:

These Cooker Hoods go beyond the norm, boasting an impressive 400m³/h airflow. It is also worth noting that the noise level of 55dBa is equivalent to the sound of a household fridge. Enjoy optimal ventilation without disruptions, setting it apart from conventional cooker hoods rated at 60-70dBa.

Conscious Choice:

The size and capacity of the extraction should match the specific requirements of your kitchen. The hoods extraction is measured in cubic meters for the air renovation. The optimal recommendation is to achieve 12 renewals per hour, aligned with your kitchen's volume:

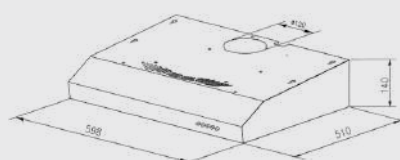

Kitchen volume = width x depth x height

Example: 3 m x 3 m x 2,5 m = 22,5 m³

12 Renovations per hour

Example: 12 x 22,5 m³ = 270 m³
